

Corporate Profile

Wabash Mfg. Inc. is an Alberta based and privately owned company located in Westlock, AB, Canada.

Since 1981, Wabash has been recognized as a manufacturer of quality tanks, trailers, mining support equipment and a line of rural fire tender units.

Wabash presently employs over 100 people on its 20+ acre facility. Our staff includes full time Professional Engineers, MET`s, Welders, Mechanics, Millwrights, Painters, Parts Technicians, and Support Staff, that are trained and certified to industry standards. Wabash is certified for the manufacturing of Dangerous Goods Transport Equipment. Our manufacturing facility features shops dedicated to the manufacturing of oilfield and mining equipment. Materials for construction include mild steel, stainless steel aluminum and fiberglass. In addition to our manufacturing division, Wabash also stocks a large inventory of parts to service our customers` needs.

With customer focus as our mandate, we intend to continue to build relationships with our clients based on their needs, service requirements and expectations. We have a proven record of achievements and look forward to new opportunities and alliances to continue our growth for years to come.

Product Tank

Wabash is proud to be affiliated with Caterpillar OEM Solutions Group, allowing customers the option of purchasing the entire unit through a local Cat dealer.

Configurations are available for 25, 30, 35 or 40 ton articulating truck platforms, using either new long wheelbase trucks, ejector models or existing "tipper" model trucks.

Our Revolutionary design focuses the mass closer to the center of the vehicle, allowing us to improve the stability of the trucks as it is now impossible to off-center the truck due to incorrect loading.
